THE STUDY OF SOCIETY

An Integrated Anthology

Edited by PETER I. ROSE, Smith College

This new integrated anthology contains 70 unabridged articles and essays which deal with the major areas of sociological inquiry. The selections offer a comprehensive overview of the nature of the discipline and a series of concrete illustrations of what sociologists have learned about the nature of society. With concise and pertinent information for each selection and detailed headnotes linking the articles, this book may be used as a basic text or a supplementary source book.

December 1966; about 1056 pages; about \$5.95 paperbound

CONCEPTS, THEORY, AND EXPLANATION IN BEHAVIORAL SCIENCES

*Edited, with Introductions, by GORDON J. DI RENZO,
Indiana University*

This volume contains the proceedings of an inter-disciplinary symposium on the subject of conceptual definition in the behavioral sciences. These previously unpublished essays by Parsons, Lazarsfeld, Levinson, and other leading behavioral scientists are concerned with the perennial question of the nature and problems of theory construction and scientific explanation in sociology, psychology, and anthropology.

A NOTABLE BEGINNING SOCIOLOGY TEXT

SOCIOLOGY

Rules, Roles, and Relationships

By EVERETT K. WILSON, *Antioch College*

Immediate acclaim greeted the publication of Wilson's **Sociology**, indicating that this new introductory text may become a leading one in its field. Already, scores of colleges and universities have expressed their intention to adopt the Wilson text, and many teaching sociologists have praised it enthusiastically. Typical of the comments received are:

"This is a very personal text, well-organized according to the way the author sees social phenomena, and perhaps the best written (in terms of style and erudition) of any now on the market. The 'Asides on Methods' are particularly good."
(Norman W. Storer, **Harvard University**)

"Seems to be one of the best of new texts. Honest, competent, squarely in the liberal arts tradition." (H. L. Ross, **New York University**)

"Appears to be a sound text. Makes effective use of figures, graphs, and tables. Delightfully written." (Frank A. Fasick, **Rutgers University**)

"This is a most impressive text. It is beautifully made, even better written, excellently illustrated and a practical title"
(L. L. Camien, **New Mexico State University**)

"This is a very readable text which is an amazing combination of clear and interesting writing and solid and dependable data. It held my interest throughout, unlike 90 percent of the texts in the field." (R. C. Davis, **Case Institute of Technology**)

"A challenging text which genuinely brings introductory sociology to the college level. Best features are concentration on basic concepts in social relations, and a realistic approach to method of research." (Donald E. Allen, **University of South Florida**)

A comprehensive and helpful Instructor's Manual is available to adopters of Wilson's **Sociology**, as well as a separate Manual of Exercises, which bears on selected problems designed to acquaint the student with sources of sociological data.

THE SOCIAL SYSTEM OF SCIENCE

NORMAN W. STORER, *Harvard University*

Demonstrates that science may be seen as a "social system" parallel in its basic dynamics to other major social systems within society. The model of a social system presented in this text is shown to be one way to look at the major institutions of society (e.g., the economic, political, family, and religious sectors), and is then shown to be applicable also in the case of science.

SOCIAL PROBLEMS

Persistent Challenges

EDWARD C. McDONAGH and JOHN E. SIMPSON, *both of the University of Southern California*

This important text covers not only frequently defined problems, but focuses also upon the recently explored problems of the effect of urban society and mass culture on the individual. "It is a good collection, the best of its kind so far. . . It brings together under one cover a series of important articles which most students and professors would not have the range of experience to bring together or would not be accessible for classroom use. It is a valuable contribution to the teaching material in the area of social problems." *Dr. Richard L. Means, Kalamazoo College, Michigan*

The first title in the

**CONTEMPORARY PROBLEMS
IN SOCIOLOGY Series edited
by Jobu D. Donovan**

**VALUES AND INTERESTS
IN SOCIAL CHANGE**

by Sister Marie Augusta Neal,
S.N.D., Emmanuel College

"... [this] work stands out as an empirically informed and theoretically relevant analysis." — *from the introduction by Neil J. Smelser*

This study focuses on groups working in the local community and examines their responses to stimuli to change long-institutionalized behaviors in community relations. In an attempt to test the relevancy of Parsonian and Marsian theories of change when applied to an actual situation, Sister Neal, acts as a questioner who wants to know what is generating both the resistance to, and the acceptance of, pressures to change that are part of contemporary life. 1965, 192 pp., paper \$2.95, cloth \$4.95

Two new books in the MODERNIZATION OF TRADITIONAL SOCIETIES Series edited by Wilbert E. Moore and Neil J. Smelser

**URBANIZATION IN NEWLY
DEVELOPING COUNTRIES**
by Gerald Breese, Princeton
University

Urbanization is invariably one concomitant of the modernization of newly developing countries, although it takes place in variable ways. Accordingly this phenomenon is studied comparatively, beginning with the scale and pace of urbanization in such countries throughout the world. June 1966, 151 pp., paper \$2.50, cloth \$4.95

**MODERNIZATION: PROTEST
AND CHANGE** by S. N.
Eisenstadt, Hebrew University,
Jerusalem

An analysis of the major characteristics of modernization, especially the processes of change and protest inherent in it. The author focuses on modernization as a process of continuous change and system-transformation, and on the ability of different modern societies to deal with problems of continuous change and sustained growth as the major challenge of modernization. November 1966, approx. 160 pp., cloth \$4.95, paper \$2.50

New books in the FOUNDATIONS OF MODERN SOCIOLOGY Series Edited by Alex Inkeles

**SOCIETIES: EVOLUTIONARY
AND COMPARATIVE
PERSPECTIVES** by Talcott
Parsons, Harvard University

An introduction to the study of whole societies as social systems. Dr. Parsons outlines an analytical scheme delineating the principal structures and processes of societies, and presents an evolutionary scheme of the stages in social development. Summer 1966, approx. 128 pp., paper \$1.50, cloth \$3.95

DEVIANCE AND CONTROL
by Albert K. Cohen, University
of Connecticut

An examination of the development of concepts and theory applicable to deviant behavior. It is not limited to crime and delinquency, but is concerned with the violation of social rules in general. Dr. Cohen explains convergent trends in current theory and the possibility of developing a unified theory of deviance and control. September 1966, approx. 128 pp., paper \$1.50, cloth \$3.95
